

**Key Features:**

- Uses Pitot/Static data, not GPS, for flight instrumentation.
- Can be mounted at any panel tilt angle.
- 1200-nit display is brightest in its class- and bright enough for any sunlit cockpit.
- Can serve as control head for remote Trig TT22 Transponder to save panel space.
- Built-in GPS navigation with CDI scale.
- Flight plan entry page with airport/navaid info database- free updates every 56 days in the U.S.
- Mount alongside EIS for complete engine and flight instrumentation.
